

# AVIVO GEAR OIL API GL-5

## DESCRIPTION

Heavy duty, extreme pressure gear oils formulated to meet more vigorous service demands of differentials, manual transmissions, axles and final drives of automotive fleets. Its special friction properties provide smooth, noise free operation and extended life of these units.

## PERFORMANCES LEVEL

API: GL-5

## BENEFITS

Due to high film strength, it provides good protection against wear.

Long service life by protecting against oxidation and oil thickening.

Contains anti – foam additives which reduce foaming. It prevents breakdown of the lubricant film on the gear tooth surfaces.

Prolongs equipment life by minimising scuffing.

## APPLICATIONS

Designed for severe loading operation where maximum gear protection is required. It is recommended particularly for hypoid final drives requiring GL-5 level performance and operating under high speed/low torque or low speed/high torque conditions.

## TYPICAL SPECIFICATIONS

SAE	Test Method	90	140	80W90	85W140
Kinematic Viscosity, cSt @ 40°C	ASTM D445	210	419	178	340
		18.5	28.5	16.5	25.5
@ 100°C					
VI	ASTM D2270	95	95	96	98
Flash Point,COC, Deg C	ASTM D92	210	220	205	220
Pour Point, Deg C, max	ASTM D97	-9	-6	-18	-12
