

AVIVO HYDRAULIC OIL

DESCRIPTION

General purpose hydraulic oils containing foam inhibitor and stabilized zinc additives which minimize wear rates in vane pump.

3. Outstanding anti-wear property and oxidation and thermal stability.
4. Excellent demulsibility, rust protection and anti-foam characteristics.

BENEFITS

1. Provides a high extreme pressure performance for high loaded systems.
2. Excellent vane pump performance resulting in reduced system maintenance and operating costs.

APPLICATIONS

Avivo HYDRAULIC OIL is recommended for use in all types of hydraulic systems except for systems with silver plated components.

It can be applied to enclosed gears operating under medium load operations.

TYPICAL SPECIFICATIONS

SAE	Test Method	46	68
Kinematic Viscosity, cSt	ASTM D445		
@ 40°C		46	68
@ 100°C		8.1	8.0
VI	ASTM D2270	96	96
Flash Point, COC, Deg C	ASTM D92	210	220
Pour Point, Deg C, max	ASTM D97	-9	-9
